

TrustedNetworkx Partner Hub — Agent Guide

Partner Hub — Agent Guide

For Sales Reps & Agents · TrustedNetworkx

Welcome to the Partner Hub. This is your toolkit for selling TrustedNetworkx solutions — POTS replacement, Hosted PBX / UCaaS, SIP trunking, internet connectivity, wireless failover, and managed voice.

Your Dashboard

When you sign in, your Home page (/) shows:

- **Personalized greeting** — "Good morning, [Your Name]"
- **Quick actions** — Register a Deal, Open Content Library, Complete a Lesson
- **Onboarding tracker** — Your progress through the 6-stage partner onboarding
- **Recent notifications** — When prospects view your shared content

Everything you see is **yours only** — your leads, your deals, your contacts.

Day-to-Day Tasks

Register a Deal

The **" + Register Opportunity"** button is in the top bar on every page. Click it anytime.

1. Fill in: Company name (required), stage (defaults to Qualification), lines/seats, vertical, contact name, contact email, notes
2. Click **Register Opportunity**
3. Your deal appears in your pipeline at `/opportunities`

Track it: Go to `/opportunities` , click your deal, and advance it through stages as you progress.

Find Sales Content

Go to `/library` . Three folders of ready-to-use materials:

- **Co-Branded Collateral** — Decks and one-pagers with your branding
- **Pitch & Demo Resources** — Scripts, elevator pitches, presentation templates
- **Compliance & Life-Safety** — NFPA 72, fire-alarm, elevator documentation

Share with a prospect: Click **Share** on any item. They get a link. When they open it, you'll be notified.

Complete Your Training

Go to `/training` . Your onboarding includes:

Resource	What you'll learn
Video courses (9 total)	Product demos, objection handling, pipeline building, technical setup
Documents (12 total)	Sales playbooks, battle cards, pricing sheets, installation guides
	Structured 6-section course with progress tracking

Resource	What you'll learn
Documentation LMS	

Start with "POTS Replacement — Product Overview" and work through the Product Training section.

Manage Your Leads

Go to `/crm`. Your personal CRM:

- **Leads** (`/crm/leads`) — Every prospect you're working. Filter by status (New → Contacted → Qualified → Proposal → Won/Lost)
- **Contacts** (`/crm/contacts`) — People directory linked to their companies
- **Companies** (`/crm/companies`) — Organization profiles

All data is **yours alone** — no one else in your agency can see your leads.

Track Your Pipeline

Go to `/opportunities`. Your deals move through 7 stages:

Qualification → Discovery → Proposal → Contracting → Won → Installed → Activated

On any deal's detail page, use the **"Advance to [next stage]"** button to move it forward. The estimated ACV is calculated automatically from your lines × MRC × 12.

What You Can See vs. Others

You can see	You cannot see
Your own leads	Other reps' leads (even in your agency)
Your own deals	Other reps' pipeline
Your own contacts	Other agencies' data at all

You can see	You cannot see
Shared content library	Admin panel
Training & documentation	Account settings (read-only)

Getting Help

AI Assistant

Green button in the bottom-right corner of every page. Ask things like: - "What's the MRC for POTS replacement?" - "How do I handle the price objection?" - "Walk me through a UCaaS demo"

Your Manager

Your agency lead can see your deals and help with escalations, pricing approvals, and deal strategy.

TrustedNetworkx Support

For technical issues, your manager escalates to the TrustedNetworkx NOC (Level 2 support). TrustedNetworkx does **not** communicate directly with your end clients — you are the face of the service.

Tips

1. **Bookmark `/library`** — it's your go-to for every customer meeting
2. **Share content before meetings** — prospects who view shared decks are warmer leads
3. **Keep your pipeline updated** — advance deals promptly so your manager can help at the right time
4. **Complete the onboarding tracker** — each stage unlocks new content and tools

5. **Use the AI Assistant** — it's trained on all product specs and sales materials
