

TrustedNetworkx Partner Hub — Manager Guide

Partner Hub — Manager Guide

For Partner Agency Leads · TrustedNetworkx

As a **Manager**, you oversee your entire agency's activity on the Partner Hub. You can see all your team's data, invite new team members, and manage your account settings.

What You Can Do

1. See Your Agency's Pipeline

Go to `/opportunities`. You see every deal every team member in your agency is working — pipeline stage, estimated ACV, close dates.

What your team sees: Each rep sees only their own deals.

2. Manage Your Team

Go to **Settings** → **Team Members** (`/settings/users`):

- **Invite a team member:** Enter their work email and choose their role (Rep or Admin). They receive an invite email. Once they sign up, they're automatically added to your agency.
- **View your roster:** See every team member with their name, email, role, and status.

- **Key contacts:** Set your Billing, Support, and Legal contacts — these are who TrustedNetworkx communicates with for invoices, escalations, and legal matters.
- **Deactivate:** Click Remove on a team member to disable their access. Their data stays in your account.

3. Access the Content Library

Go to [/library](#) . Browse sales decks, one-pagers, battle cards, and demo scripts organized by folder:

Folder	What's inside
Co-Branded Collateral	Decks with your agency's branding
Pitch & Demo Resources	Scripts, elevator pitches, presentation templates
Compliance & Life-Safety	NFPA 72, fire-alarm, elevator line materials

How to share: Click **Share** on any item. Your prospect gets a tracked link. When they open it, you'll get a notification.

4. Complete Training

Go to [/training](#) . Your team has access to: - **9 video courses** covering product training, sales techniques, and technical setup - **12 downloadable documents** including playbooks, battle cards, and installation guides - **Certification tracks** (coming soon) with badges and rewards

Track your team's progress in the Documentation LMS ([/documentation](#)).

5. Use the CRM

Go to [/crm](#) . Your agency's CRM includes:

Page	What it does
/crm	Dashboard — total leads, companies, contacts, won deals

Page	What it does
<code>/crm/leads</code>	Lead table with status filters and search
<code>/crm/contacts</code>	People directory linked to companies
<code>/crm/companies</code>	Organization profiles with industry and lead counts
<code>/crm/forms</code>	Embeddable lead capture forms for your website

As manager, you see **all** leads, contacts, and companies in your agency.

6. Track Deals

Go to `/opportunities` . Each deal moves through 7 stages: 1. Qualification 2. Discovery / Site Survey 3. Proposal 4. Contracting 5. Closed Won 6. Awaiting Install 7. Activated

Click any deal to see its detail page: stage stepper, ACV calculator, engagement analytics.

7. Customize Your Branding

Go to **Settings** → **Brand & Company** (`/settings/brand-kit`): - Upload your logo (used on co-branded collateral) - Update company info (website, phone, email) - Set your partner profile: lines under management, team size, voice platforms, PSA tools, verticals served

What You Cannot Do

- See other agencies' data (strictly isolated)
- Promote anyone to admin (only TrustedNetworkx can)
- Access the Admin Panel (`/admin` — restricted)
- Change your company's registered domain

Your Login

- **URL:** `https://hub.trustednetworkx.com/login`
- **Email:** Your work email (as registered by your admin)
- **Role:** `manager`

If you forget your password, contact your TrustedNetworkx channel manager or use the "Forgot password" link on the login page.
